Top Skills

Python

Distributed Systems

AWS (Lambda, ECS, DynamoDB)

Languages

English (Native)

Spanish (Professional Working)

Certifications

AWS Certified Solutions Architect - Associate

Certified Kubernetes Application Developer (CKAD)

Summary

Backend engineer with 8 years of experience building reliable, high-throughput services. I enjoy turning messy business processes into clean APIs, and lately I've been building LLM-powered tools and agents for internal teams. I care about observability, simple designs and mentoring newer engineers.

Experience

Northwind Analytics

Senior Software Engineer

March 2022 - Present (Austin, Texas)

Lead engineer on the data ingestion platform processing ~2B events/day. Migrated batch ETL jobs to an event-driven architecture on AWS (Kinesis, Lambda, DynamoDB), cutting data latency from hours to under a minute. Built an internal LLM assistant that answers questions over engineering runbooks. Mentor four engineers.

Bluepeak Logistics

Software Engineer II

June 2019 - February 2022 (Denver, Colorado)

Built the shipment tracking API in Go and PostgreSQL serving 40+ partner integrations. Introduced OpenTelemetry tracing and SLO dashboards, reducing incident resolution time by 35%.

Lumen Ridge Software

Software Engineer

July 2017 - May 2019 (Denver, Colorado)

Full-stack development on a scheduling SaaS product using Python (Django) and React. Owned the billing integration and automated the release pipeline with GitHub Actions.

Education

University of Colorado Boulder

Bachelor of Science, Computer Science (2013 - 2017)
